1. First, grab your markers and color the cool drawing to the right. It's the sculpture that will be displayed in the neighborhood that wins the Smallest User competition. The sculpture is made of recycled glass bottles, and it glows in the dark!

2. Second, ask your parents to take a picture of your drawing and e-mail it to Ashley Akin at [alakin@memphis.edu](mailto:alakin@memphis.edu). Be sure to write in your name, your age and your zip code. You can just write in your first name, if you want to.

3. Flip over this paper and read about 10 easy ways that you can help your parents save energy. Then, make sure that you do your part to save energy at home and in your community!
